Scopes

The Second International Seminar on Materials and Engineering Structures (ISMES 2025) serves as a pivotal platform for researchers and industrialists to engage in insightful exchanges and debates on the latest innovations in composite materials. The seminar not only fosters collaboration but also encourages the formation of working and expert groups tailored to specific areas of interest, aiming to address future challenges in the field of materials science. The submitted papers may cover one or more of the topics listed below and can extend to emerging areas, ensuring a broad dissemination of knowledge and advancements in composite materials across various disciplines.

Papers Submission:

ISMES 2025 invites industrial practitioners and researchers to submit papers offering reliable solutions to challenges within the seminar's core topics. We are particularly seeking original research in Engineering, Materials, and Structures to address issues arising from the growing use of materials across diverse industrial sectors.

Submission Guidelines:

- Papers must be original and written in either French or English.
- Submissions must be in Microsoft Word format.
- Abstract submission must be exclusively on the seminar platform.

Topics:

- 1-Structures.
- 2- Engineering.
- 3- Materials.
- 4- Renewable energies.
